GIT-207 Assignments 2nd week

1. **Mention:**

a. **Complications of Enterohemorrhagic *E. coli* (EHEC).**

……

……

b. **Microbiological features of *Vibrio cholerae.***

……

……

2. **Explain:**

a. **Mechanism of action of Shiga toxin.**

……

……

b. **Pathogenesis of *Clostridium difficile* induced diarrhea.**

……

……

c. **Why antibiotics are contraindicated in treatment of Enterohemorrhagic *E. coli* (EHEC) induced diarrhea.**

……

3. **Compare between non-inflammatory and inflammatory diarrhea:**

	Non-inflammatory diarrhea	Inflammatory diarrhea
Mucosal invasion		

PMNs		
Fever		
Example of causative pathogens		

4-Enumerate FOUR drug groups that can be used in management of peptic ulcer diseases.

a) ----------

b) ----------

c) ----------

d) ----------

5- Explain the mechanism of action of each of the following Drugs:

- Antacids: ----------
- H2-receptor antagonists: ----------
- Proton Pump inhibitors: ----------
.- Misoprostol: ----------
- Colloidal bismuth: ----------
- Sucralfate: ----------

6- Enumerate THREE drugs used in triple therapy for eradication of H. Pylori.

----------, ----------, ----------

7- Enumerate FOUR therapeutic uses of H2-receptor antagonists.

a) ----------

b) ----------

c) ----------

d) ----------

8- Enumerate FOUR adverse effects of Cimetidine.

a) ----------

b) ----------

c) ----------

d) ----------

9- Enumerate FOUR therapeutic uses of Proton pump inhibitors.

a) ----------

b) ----------

c) ----------

d) ----------

10- Enumerate FOUR adverse effects of Proton pump inhibitors.

a) ----------

b) ----------

c) ----------

d) ----------

11- Mention THREE adverse effects of each of the following Drugs:

- Misoprostol: ----------, ----------, ----------
- Colloidal bismuth: ----------, ----------, ----------
- Sucralfate: ----------, ----------, ----------

12- What is the main function of bicarbonate in pancreatic juice?

……

……

13- Which hormone stimulates enzyme-rich pancreatic secretion?

……

14- Where is bile stored before release

…….

15- List three functions of the liver

……

……

……

16- Summarize Hormonal control of pancreatic secretion

……

……

……

17- Describe the two-stage mechanism of salivary secretion.

……

……

18- List four functions of saliva and briefly explain each.

……

……

……

……

19- What are the three phases of swallowing? For each phase, state whether it is voluntary or involuntary and mention one key event.

……

……

……

……

20- Explain the difference between conditioned and unconditioned reflexes in the control of salivary secretion. Give one example of each.

……

……

……

……

21- Describe the anatomy of the tongue and mention their function.

……
……
……

22-In a table enumerate muscles of the tongue with their actions and nerve supply.

……
……
……
……

23-Enumerate structures forming the stomach bed.

……
……
……

24-Describe anatomy of the pharynx; length, beginning, end, blood and nerve supply.

……
……
……
……

25-Mention complications of *Ascaris lumbericoides* infection

---

26-Give reason, why infection with *Taenia solium* is more dangerous than infection with *Taenia saginata*

27- An 8-year-old boy was not sleeping well, had been irritable, and had complained about anal itching and irritation. The boy's younger sibling also began to complain of similar symptoms. The children were taken to their pediatrician for evaluation. A specific parasitological laboratory test was ordered to provide a diagnosis. An egg was seen microscopically allowing the laboratory to identify the cause.

1. What is the causative parasites?

---

2. Which type of laboratory procedure would the physician have ordered to make a diagnosis?

---

3. mention the infective stage and mode of infection

28-A 30-years old female, came to hospital complaining of abdominal pain, profuse watery diarhoea for several weeks leading to progressive weight loss, emaciation and severe exhaustion. The patient gave history of being fond of eating roasted fish. The doctor advised to make stool examination, blood picture and serum electrolytes which show electrolyte disturbance, anaemia and eosinophilia.

1. **What is your diagnosis and what is the causative parasite?**

---

2. **What is the diagnostic and infective stage?**

---

3. **How is this infection transmitted?**
