4) a. clean → Vaccine only if needed
contaminated → Vaccine & TIG

b. Active Vaccine Passive TIG

c. early treatment • Immunization boosters

5) a. exposure category 2 or 3

b. PEP: wound washing, Rabies Vaccine & RIG

c. Vets & lab workers

6) a. High-risk occupations: Veterinarians & animal handlers

b. 3 doses Vaccine

c. Dog Vaccination & stray control

7) a. observe dog 10days

b. god remains healthy

c. Reporting & monitoring cases

جواب نما

8) a. agent Rabies virus
Host humans/animals
environment rural areas

b. Vaccination dogs
public awareness

c. Bite or saliva

9) a. Hepatitis A or E

b. feco or oral

c. clean water & hygiene

10) a. HBIG & Vaccine

b. Health care workers

c. Vaccination & safe needles

11) a. Role: source of infection

b. screening & Hygiene

c. $HBsAg$ testing

جورت نيا

12) a. HBIG & Vaccine within 24hrs

b. from mother to baby

c. Birth dose + schedule

13) to 16)

typhoid

mode: feco-oral

carriers: chronic (gal bladder)

control: clean food & water, treat carriers

Risk factors: ~~Po~~ poor sanitation contacts:

screening ± antibiotics education: hand washing

17) smoking, HTN, diabetes, obesity, High colesterol & sedentary life style

18) low fat, low salt, High fiber & (fruts & vegetables).

جورج نبا

-19) Exercise, weight control, healthy diet, screening, avoid suger excess & stop smoking.

-20) HBV → Liver cancer, EBV → Lymphoma, HPV → cervical cancer, HCV → Liver cancer H. Pylori → Gastric cancer

-21) Antitoxidants, Fiber & Reduce Processed meat

-22) Lump, Bleeding, weight loss, non-healing ulcer, change in bowel habits & persistent cough

-23) MCH, safe water, nutrition, Immunization, disease control & health education.

-24) equity, community participation & intersectoral coordination.

-25) behavior change, Awareness & improve health

جورج نبا

-26) language, culture, education & noise.

-27) Direct interaction, Better understanding & Immediate feed back

-28) ventilation, lighting, clean water & sanitation

-29) climate change, respiratory diseases & ozone depletion

-30) treatment of sewage, safe disposal & monitoring
